SUMMARY

A graduate of the Information Systems program with expertise in developing web-based information systems. Proficient in PHP, Laravel, and MySQL, and possesses an understanding of UI/UX, database management, system analysis, and software testing. Possesses strong problem-solving and teamwork skills, as well as adaptability, and is able to work with discipline and responsibility and complete tasks effectively.

EDUCATION

Gunadarma University – Jakarta Sept 2022 – Sept 2026
Bachelor of Information Systems
GPA: 3.79 / 4.00

PROJECT EXPERIENCE

Inventory Management System Apr - Jun 2025
Scientific Writing

- Developed a web-based inventory management system to streamline stock management and improve operational efficiency.
- Achieved a 4.84/5 usability score based on testing with 10 respondents, indicating strong user acceptance.
- Improved stock reporting efficiency by replacing manual record-keeping with a centralized digital system.
- Designed a responsive user interface using Bootstrap, supporting easier and more efficient daily operations.
- Designed and managed a relational MySQL database to centralize inventory data and reduce manual data handling.

Software Requirements & Design Documentation June 2026
LSP Certification Project – Gunadarma University

- Developed Software Requirements Specification (SRS) to define functional and non-functional requirements based on identified user and business needs.
- Created Software Design Description (SDD) covering system architecture, database design, UML diagrams, and system components.
- Produced comprehensive software documentation to establish a clear reference for the system development process.

Web-Based Point of Sale & Stock Forecasting System Apr - July 2026
Undergraduate Thesis

- Developed a web-based inventory system integrated with a Point of Sale (POS) feature to automate sales transactions and update inventory levels in real time.
- Implemented Single Exponential Smoothing (SES) for stock forecasting to support inventory planning and restocking decisions.
- Conducted Black Box Testing, Google Lighthouse performance testing, and User Acceptance Testing (UAT), achieving a performance score of 94 and user acceptance rate of 87.6%.

Certification & Training

- **Fundamental Web Programing**
  E-Cerfification
- **JavaSricpt | Workshop**
  E-Cerfification
- **Analyze Software Requirements**
  E-Cerfification

- **Occupation of System Analyst – BNSP**
  E-Certification

SKILLS

Technical Skills: System Analysis & Design (UML, DFD, ERD), Requirements Analysis, Basic UI Design (Figma), Microsoft Excel, Word, PowerPoint, Technical Documentation.

Soft Skills: Detail-Oriented, Time Management, Communication, Team Collaboration, Discipline, Professionalism
